### DIRECTOR GENERAL'S MESSAGE

*"New national education policy focuses on learning instead of studying, goes beyond curriculum to focus on critical thinking." – Shri. Narendra Modi, Prime Minister of India*

India is changing and so are the educational outlook and student aspirations of a nation that is rightfully claiming its exalted status in the 21<sup>st</sup> century global arena. As envisioned by the Govt. of India, education outlook under the National Education Policy (NEP) 2020 is focused on the aspect of 'How to think', encouraging development of critical thinking and innovation skills in the burgeoning youth population. The country today is standing at the cusp of educational transformation. Discussions on expanding curriculum offerings, making it holistic, flexible and multidisciplinary have been rapidly paving the way for upgradation of existing educational infrastructure alongside opening the path for global institutions of repute to set up base in the country, thus empowering our youth with education excellence at par with global standards.

NICMAR is proud to be a partner in this very exciting journey in alignment with NEP through the setting up of its first ever 'Built Environment University' on the lines of offering holistic learning that empowers our students and channels their creative potential for augmenting their employability. The multidisciplinary programmes at NICMAR are focused on offering skill based, project based and action oriented experiential learning to align students with critical aspects of the business environment and industry/project contexts in line with the NEP framework. NICMAR for the past three decades has been a Knowledge Leader for the CRIP

sector and continues to be the harbinger of educational change for this sector in the journey ahead.

*Professor Anil Kashyap  
Director General, NICMAR*

#### LATEST UPDATE
